

FLEX-REPAIR

FLEX-REPAIR

Makes workflows even more flexible

Repair cosmetic damage easily!

The share of cosmetic damage repairs in a bodyshop's everyday routine is on the rise. But can your bodyshop continue to make a profit this way? In fact, it can – thanks to R-M's innovative **FLEX-REPAIR** concept. As part of the **Programs For Success** service offer, **FLEX-REPAIR** supports bodyshops in organizing their workflows even more flexibly than before. The concept calls for "multi workplaces", which make handling special repairs easy, since everything is in one place. The vehicles no longer have to be moved around and entire steps can be eliminated. This means that a single employee can perform the entire refinishing job.

Even more flexible workflows

This is FLEX-REPAIR:

- **What do you need?**

With **FLEX-REPAIR** an R-M consultant works together with your bodyshop to determine whether you perform enough cosmetic damage repairs to make a multi workplace worthwhile.

- **How much do you need to invest?**

The consultant then determines what purchases you need to make so that you can implement **FLEX-REPAIR**. And just as important: how quickly the investment will pay off!

- **What do we recommend?**

The R-M consultant presents an overall assessment of the various items that have been analyzed. Based on the assessment, the consultant develops a specific plan with the best way to implement the recommendation.

- **How is FLEX-REPAIR implemented?**

The consultant supports your bodyshop in selecting the equipment you need. The equipment is then installed. The bodyshop staff also receives special training both in the techniques used at the multi workplace and on commercial aspects. R-M monitors the implementation of **FLEX-REPAIR** to measure its success and make sure it is sustainable.

R-M: Perfection made simple

The R-M brand is strongly committed to our customers' long-lasting success in a constantly changing market. With **Programs For Success**, R-M works closely with bodyshops, offering them optimum support. R-M's innovative **FLEX-REPAIR** concept allows your bodyshop to design your workflows even more flexibly so that you can continue to work profitably in the future.
