

Improve
the performance
of **ONYX HD** !

MIXING BASE W

The pigments that make all the difference

Perfection made simple

A single objective: productivity!

In addition to its range of base colors, with **MIXING BASE W R-M** opens new horizons to bodyshops that want to improve their productivity. Eight new base colors with an incredibly high pigment concentration provide the following advantages:

- **Cost-effectiveness is guaranteed**, thanks to the reduction in labor costs and product consumption.
- **Good quality repairs** that ensure increased customer satisfaction.
- **Work is made easier** for painters with products that are simple to use.

Boost your color performance and your savings!

ULTRA-CONCENTRATED PIGMENTS FOR MAJOR SAVINGS

- **Between 15% and 40% product savings** by reducing the number of basecoats required.
- **Up to 50% savings in process time**, by eliminating a stage of the repair process, depending on the mixing formulae.

Achieving the perfect result, easily!

Thanks to its low viscosity, the application of the color is easier. The superior durability of the paint film ensures superb final finish quality by virtually eliminating damage during reassembly, easy repair of minor defects and de-nibbing, if required, and safe masking immediately after drying, if necessary.

- **Increased covering power**
- **Faster flash off times**
- **Outstanding through-drying**
- **Reduced process times**

Technical features that make all the difference!

Enhancing the performance of **ONYX HD**

MIXING BASE W bases are the perfect performance enhancers for **ONYX HD** because they fit into the usual work processes and at the same time ensure a superb final result. Customized mixing formulae have been developed and complete the existing base colors. The **MIXING BASE W** bases combine all the advantages of new and innovative technology, while maintaining **ONYX HD**'s reputation for outstanding quality.

A winner for every bodyshop!

Innovating for the future

Since its arrival on the market, the **ONYX HD** range of products and its water-borne technology has reflected R-M's reputation as a pioneer and an innovator. The **ONYX HD** range is recognized worldwide as the environment-friendly range and by choosing **MIXING BASE W** you can ensure an enhanced level of performance that can significantly increase the efficiency and profitability of your bodyshop. Eight shades are available: emerald green, jade green, steel blue, Tanzania blue, lapis-lazuli blue, curry orange, Caspian red, chili red; suggestive bewitching names for our customers' utmost satisfaction.
