

PRESS RELEASE

R-M Automotive Refinish

May 2018

STRONG AND FAST ON ALUMINUM AND STEEL: UNIVERSAL UNDERCOAT MATERIAL UNI WASH P 5530 FROM R-M®

Gives rust no chance: R-M, BASF's premium paint brand, offers UNI WASH P 5530, a primer filler, including primer, which ensures high performance on aluminum and stainless steel substrates in the commercial vehicle sector. The success of UNI WASH P 5530 is not simply due to its exceptional anti-corrosive properties. As a fully chromate-free product it helps to protect both environment and health. Further, it is ultra fast. UNI WASH P 5530 dries in a flash at 20°C, making it the ideal choice for paint repairs.

UNI WASH P 5530 is sustainable: Corrosion protection without chromate

In the commercial vehicle sector, state-of-the-art body shops need advanced paint products to guarantee outstanding performance. They should offer efficient results when working on various types of vehicles. And it is an added bonus when the products are also good for environment and health. The newly developed undercoat material UNI WASH P 5530 meets all these demands, as it guarantees a reliable finish every time without the use of chromate.

Brilliant: Strong adhesion, excellent flow

The undercoat material UNI WASH P 5530 offers exceptional anti-corrosive properties on aluminum, steel, and stainless or galvanized steel, while ensuring perfect adhesion, in particular on aluminum surfaces. UNI WASH P 5530 dries ultra-fast at 20°C and convinces with its excellent flow properties.

Perfection made simple

Rational: A product for every need

UNI WASH P 5530 replaces the previous undercoat material GRAPHITE HD PRIMER CF. And just like its predecessor, it is suitable for both 2-layer and 3-layer systems. It also helps to free up storage space, as the versatile undercoat material can be applied to various types of vehicles. All this and more without any compromise to quality. UNI WASH P 5530 is the undercoat material for all substrates. Moreover, it can be simply used with the existing R-M product range. Meaning there is no need to purchase new equipment for paint application.

R-M Automotive Refinish Paints: an important part of BASF Coatings

Under the R-M brand, BASF markets a comprehensive range of paint systems for vehicle refinishing. Special focus is given to ecologically efficient water-based paints and high-solid paints. By using these systems all legal solvent-reduction requirements can be complied with anywhere in the world, and with regard to appearance and resistance, the products meet the same quality standards as solvent-borne paints. In this area, the company offers a wide variety of services to support its customers. R-M Automotive Refinish Paints is approved by most of the leading car manufacturers for aftermarket repair and chosen by the world's most prestigious car companies for its colour expertise.
