

PIONEER SERIES

# No need to heat. Your spray booth just got a lot cooler.

Our new air-drying and IR technologies keep temperatures in your booth lower than 20°C, protecting both the planet and your wallet.

Save up to  
**70%**  
on your  
energy costs.

Perfection  
made simple

A brand of BASF – We create chemistry

# Beat rising energy costs with our new cooler, air-drying process.

Our innovative air-drying technology removes the need for baking so your body shop can reduce CO<sub>2</sub> and energy costs during the paint process by up to 70%. More sustainable. More profitable. In one.

That's right. This ground-breaking, low energy consumption process offers substantial savings by countering rising energy costs in a sustainable way. Prepare yourself for a new, cooler way of working.

## Air-drying and IR technologies lead to great benefits:

**Save up to 70% on your energy costs**

**Save up to 60% on gas per repair cycle**

**Manufactured using less fossil resources**

**Better for the planet,  
better for your business.  
Everyone wins with  
#EcoEffectiveness.  
Order yours today.**
