The multi-talented product for warding off rust: **GRAPHITE HD HS EPOXY P5420.**

Surfaces like aluminum and steel demand effective corrosion protection. R-M's chromate-free GRAPHITE HD HS EPOXY P5420 primer filler is not only the best in its class; it also offers reliable protection in the commercial vehicle sector. GRAPHITE HD HS EPOXY P5420 can be used in both two-stage and three-stage paint systems and as a true multi-talented performer, it is highly versatile. The primer filler is gray, and when used with GHD CV PRIMER TINTING PASTE, can be tinted very easily in line with R-M's grey shade concept. It's a powerful primer filler for all substrates.

Best corrosion protection on aluminum and steel

Use and application

R-M: Perfection made simple

A primer filler that can be applied to different substrates is extremely versatile. And for aluminum in particular, GRAPHITE HD HS EPOXY P5420 offers outstanding corrosion protection. Chromate-free GRAPHITE HD HS EPOXY P5420 delivers top performance. By developing ever newer and innovative products, R-M, the premium brand in the automotive refinishing sector, ensures that its customers can work sustainably and productively.
