

Colortronic 2

Perfection made simple

Advanced colour matching technology in your bodyshop

R-M pioneered the use of portable spectrophotometers in automotive refinishing back in 1995. Now, with Colortronic 2, your bodyshop can benefit from the speed and accuracy offered by the latest in state-of-the-art colour matching technology.

• You need Colortronic 2

You will have the opportunity to benefit from fast, hyper-accurate colour matching, which does not rely solely on the human eye. Using Colortronic 2 **the best formula, including any variants is just a click away**. An accurate visual check is confirmed quickly and easily using the colour cards from the world leading Colormaster. All the information is presented in any one of 35 languages.

• Easy to use for your staff

Colortronic 2 is **intuitive and easy to use**. Simple touch controls enable the user to measure the colour instantly. Colortronic 2 then cross references with the enlarged Shop Master or Color Explorer 2 database to identify the colour formula then all you do is mix the paint !

• Real benefits for your bodyshop

Colortronic 2 will significantly reduce process time and materials compared to when colour matching conventionally, **improving your bodyshop's efficiency and profitability**. Colortronic 2 enables your staff to measure the colour of several cars accurately, in minutes. All these readings can be stored for reference, while the regularly updated colour library software ensures the latest and best colours are listed. Bluetooth link between Colortronic 2 and computer can be used for an easier connection. **It's fast, reliable and it's accurate.**

- Three simple steps to a perfect match. Simply measure the colour, research the formula and mix the paint. Colortronic 2 saves time, improves efficiency and profitability in your bodyshop.
- The intuitive design of Colortronic 2 makes colour identification quick and easy.

**Colortronic 2 from R-M,
it's like having your own colour lab!**
