

## Some tips

For a better selection of the best result, color and in option spectral curves can be displayed, with possibility to zoom.

Visualization of all variants related to the color, including corresponding Colormaster references and mixing formula.

Variant	Formula	Color Ref.	Formula No.	Base	Ratio	Quantity
10	1000000	1000000	1000000	1000000	1000000	1000000
11	1000000	1000000	1000000	1000000	1000000	1000000
12	1000000	1000000	1000000	1000000	1000000	1000000
13	1000000	1000000	1000000	1000000	1000000	1000000
14	1000000	1000000	1000000	1000000	1000000	1000000
15	1000000	1000000	1000000	1000000	1000000	1000000
16	1000000	1000000	1000000	1000000	1000000	1000000
17	1000000	1000000	1000000	1000000	1000000	1000000
18	1000000	1000000	1000000	1000000	1000000	1000000
19	1000000	1000000	1000000	1000000	1000000	1000000
20	1000000	1000000	1000000	1000000	1000000	1000000

Additional to traffic lights, color ranking gives an indication on the performance of the adjustment.

Variant	Formula	Color Ref.	Formula No.	Base	Ratio	Quantity
10	1000000	1000000	1000000	1000000	1000000	1000000
11	1000000	1000000	1000000	1000000	1000000	1000000
12	1000000	1000000	1000000	1000000	1000000	1000000
13	1000000	1000000	1000000	1000000	1000000	1000000
14	1000000	1000000	1000000	1000000	1000000	1000000
15	1000000	1000000	1000000	1000000	1000000	1000000
16	1000000	1000000	1000000	1000000	1000000	1000000
17	1000000	1000000	1000000	1000000	1000000	1000000
18	1000000	1000000	1000000	1000000	1000000	1000000
19	1000000	1000000	1000000	1000000	1000000	1000000
20	1000000	1000000	1000000	1000000	1000000	1000000

Programs For Success

Training Programs

1

## Prepare

- 1 Identify a relatively flat area closest to the panel being refinished, undamaged and free from imperfections.
- 2 Clean the entire surface and polish the area (15 cm<sup>2</sup>) to be measured.
- 3 Then spray with glass cleaner and wipe dry to remove any residue from the polish.

Be sure Colortronic 2 has been calibrated against the standard samples.

Calibrate at the temperature where the reading will be performed.

2

## Measure

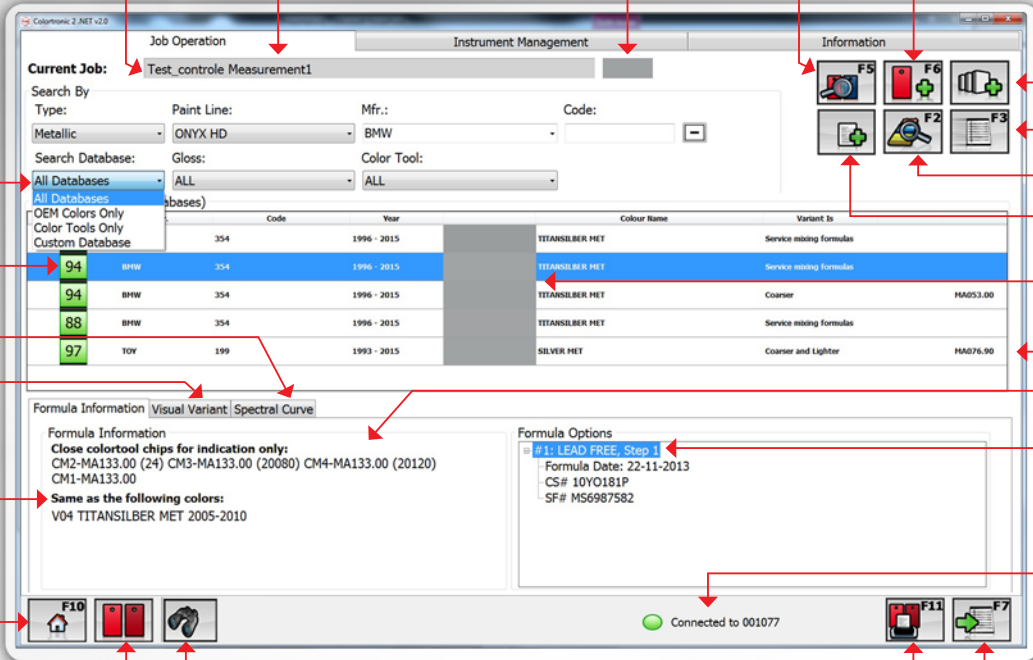

- Every measurement should be performed on the paint surface around the damaged area.
- Remember to keep Colortronic 2 flat to surface.
- Move and rotate the Colortronic 2 after each measurement within the cleaned area and continue scanning until unit has completed and calculated the measurements.
- Be certain to press the instrument firmly against the vehicle and don't let it rock as the reading is being taken.

3

## Select the best result

- 1 Select the best result relating to the manufacturer of the vehicle.
- 2 The best candidate for adjustment is flagged “\*ADJ”.
- 3 In general, R-M recommends a thorough visual check before painting
  - with the proposed/displayed R-M Colormaster cards or
  - via a spray out of the best formula proposed by the spectrophotometer retrieval application
