Excellence with  
R-M's waterborne **ONYX HD**

Perfection made simple

# THE SIGN OF EXCELLENCE IN OUR PROFESSION: **ONYX HD**

At R-M, our main priorities are the long term profitability of our customers, at the same time protecting the environment. That's why our research and development team, which is renowned for innovation, continues to develop products that are easy to use and significantly reduce process times while ensuring perfect results.

**ONYX HD** is a waterbased paint range that is the result of over 15 years of continuing technological revolution, ensuring outstanding refinishing performance.

## A RANGE OF CLEARCOATS WITH A BRILLIANT GLOSS

The range of clearcoats specially developed for **ONYX HD**, guaranteeing an unparalleled finish that has established **ONYX HD** as the industry benchmark.

The **Colormaster** colour tool and **Colortronic 2** spectrophotometer work perfectly with **ONYX HD**.

1. **ONYX HD** is made up of waterbased tinting bases containing very high pigment concentrations, **guaranteeing exceptional stability over five years**. The waterbased additive is added by the painter during the colour preparation.
2. **ONYX HD** can be adapted easily for use in all conditions. The **HYDROMIX**, **HYDROMIX SLOW**, **HB002** and **HB004** additives make it easy to apply and achieve an excellent result regardless of the weather conditions, even extreme ones. **ONYX HD Interior** enables to apply the **ONYX HD** basecoat, ensuring durability without the need for a clearcoat on interior parts like engine bay and luggage space.
3. **ONYX HD** significantly reduces drying time. R-M recommends application in a spray booth with accelerated air drying systems, such as venturi driers.

An unparalleled end result is achieved regardless of the technique employed: full panel or blend-in.

The bodyshop moves forward with a product with lower solvent emissions, promoting a safer environment and increased profitability.

A bodyshop manager who works with **ONYX HD** reflects:  
 «The painters in my bodyshop have been using **ONYX HD** for over 12 years and we all value the performance of this waterborne line for various reasons: product quality, stock reduction, ease of management and boosted productivity. Why look for a different solution when you already have the best?»

**ONYX HD** has been approved by the world's leading vehicle manufacturers.

**ONYX HD**,  
Undeniably brilliant!
